To join our club and fly model aircraft, it is mandatory that you also join the **Model Aeronautic Association of Canada (MAAC)**. Among other things, they provide members with \$5,000,000.00 in liability insurance. MAAC fees are \$75.00 for Open members and \$10.00 for Junior members. You can join MAAC on your own or the club can submit your MAAC application on your behalf when you join our club.

Proof of MAAC membership is mandatory when you join our club

How do I learn to fly R/C aircraft?

Answer: No one is an instant jet pilot or aerobatic air show pilot. The R/C pilot learning curve is the same as for the full scale pilot. The fighter pilot started on trainers and worked their way into increasing challenging aircraft over time. They master a specific skill set prior to moving to the next level. Flying skills will improve the more often you fly.

The most important point, one which cannot be overstressed: **GET AN INSTRUCTOR!** You cannot learn on your own without crashing your aircraft and or probably hurting someone or yourself. It is always the best option to join a local club where one is available to you.

The most common method of learning how to fly involves the use of a buddy box. The student controls the model with the buddy box, which is connected to the instructor's transmitter.

The instructor can take control of the students buddy box if and when necessary by the flip of a switch on the instructor's transmitter (MAAC)

Training

We have a training program for new members. The program includes instruction in basics of flight, one on one hands on flight training using either your own plane or the club trainer plane, and safe operation and care of the equipment. This program progresses at each individual's own rate, some people may complete the program in a month while others may take the whole season to complete. The aim of this program is to promote safety and provide you with the opportunity to have fun while you are learning.

Prearranged training nights are on Mondays from 4:00 pm on.
Rain day Tuesday, if weather permitting.
